OSKALGOSA, KARSARPHY

Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor librers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the internal viscera and excreting organs of the body. The liver becomes torpid and fails to socrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spheen, the kidneys, and the stomach sympathise with the liver, and become disordered also. Finally, the Instinct of our organism, as if in an attempt to expel the unions disordered also. Finally, the Instinct of our organism, asid in an attempt to expel the maxious infusion, concentrates the whole blood of the body in the internal excretories to force them to cast it out. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the CHILL. But in this effort it fails. Then the Faven follows, in which the blood leaves the central organs and rushes to the surface, as if in another effect to expel the irritating poison through that other great excretory—the sain. In this also it fails, and the system abundons the attempt or austed, and waits for the recovery of strength exhausted, and waits for the recovery of strength are the fits or paretysms of Ferzit and Aour.
Such constitutional disorder will of course undermine the health if it is not removed.

We have labored to find, and have found, an entidate,

Ayer's Ague Cure, which neutralises this malarious poison in the blood, and stimulates the liver to expel it from the body. As it should, so it does care this afflicting disorder with perfect certainty. And it does more, or rather does what it of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health although exposed to the discuss. Consequently it not only cares, but proteets from the great variety of affectious which are induced by this malignant induced, such as Remittent Perce. Chill Fever, Dumb, or Maked Ague, Periodical Headache, or Bilious Headache, Bilious Fevers, Nauralgia, Rheumalism, Gont, Blindness, Periodical Heralache, or Bilious Headache, Billoone, Fevers, Neuralgin, Rheumalism, Gout, Blindness, Toothache, Earache, Catarth, Aathma, Palpitations, Painful Affections of the Spicen, Hysterics, Colle, Paralysis, and Painful Affections of the Stomach and Boxels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "AGUE CURE" to wee the cause of these decangements, and cures the disease.

the disease.

This it accomplishes by stimulating the exerctories to expel the virus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatation. Time may accomplish the same end, but often life is not long enough, or is sacrificed in the attempt while this "Acra Cura" does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the miasmatic infection, then any other which has been discovered; and it has still arother important advantage to the public, which is, that
